ITEM NUMBERS
(1) #TOACAORG16
(2) #TOACAORG20
(3) #TOACATRP24
(4) #TOACATRP30
(5) #TOACATRPDS
(6) #TOACATRPSS

TOOLS REQUIRED
(1) 3/8” Wrench (not provided)
(2) Phillips head screwdriver (not provided)
(1) Plastic mallet (not provided)
(1) 5/32” Hex key (provided)

INSTALLATION ON LINX ORGANIZERS

#TOACAORG16 AND #TOACAORG20

1. Insert the top flange of the Mounting Bracket into the channel in the Linx organizer and then drop the bracket down to engage the hooks. See figure 1.

Figure 1
INSTALLATION ON LINX ORGANIZERS (cont.)

2. Slide the Mounting Bracket into the desired location. Place the Bottom Bracket over the Mounting Bracket and then push the tabs down in between the bottom channel of the organizer and the fabric panel. See figure 2.

3. Install two thumb screws into the threaded holes in the top of the Mounting Bracket. See figure 2. Turn the screws until they make contact with the rear of the organizer. **Do not over tighten.** Secure the Bottom Bracket with two #10-24 x 3/8” phillips pan head thread forming screws. See figure 3.

4. The Wall Bracket can be installed at one of two locations on the Mounting Bracket. Attach the Wall Bracket using two #10-32 x 1/2” Phillips head machine screws and two lock washers (provided) as shown in figure 3.

5. Attach the Wall Plate Casting to the Wall Bracket and tighten the set screw using the 5/32” hex key. See figure 4.
INSTALLATION ON TECH ORGANIZER, FOUNDATIONS AND LMS FRAMES

#TOACATRPSS AND #TOACATRPDS

Mounting Bracket (single standard)

6. Attach the Wall Bracket to the Mounting Plate using the two #10-32 x 5/8” phillips flat heads screws, lock washers and #10-32 lock nuts provided. See figure 5.

*Important:* The Hook Plates must be assembled to the side of the Mounting Plates that have “HOOK PLATE THIS SIDE” stamped into it.

7. Insert the hooks on the back of the Mounting Bracket Assembly into the slotted standard at the desired height and push down. Tap the top of the bracket assembly with a mallet to ensure that the hooks are seated. See figure 7. Install a #10-24 x 3/8” Phillips pan head screw into the hole at the bottom of the bracket assembly and tighten securely.

8. Attach the Wall Plate Casting to the Wall Bracket and tighten the set screw using the 5/32” hex key. See figure 8.

Mounting Bracket (double standard)

The Mounting Bracket for double slotted standards come un-assembled and consist of a Mounting Plate, a Hook Plate, and a Wall Bracket.

*Important: The Hook Plate must be assembled to the side of the Mounting Plate that has “HOOK PLATE THIS SIDE” stamped into it.

9. Attach the Wall Bracket to the Mounting Plate using the two #10-32 x 5/8” phillips flat heads screws, lock washers and #10-32 lock nuts provided. See figure 9.

10. Attach the Hook Plate to the Mounting Plate using six #10-32 x 5/16” phillips flat head screws as shown in figure 10.
11. Insert the hooks on the back of the Mounting Bracket Assembly into the double slotted standard at the desired height and push down. Tap the top of the bracket assembly with a mallet to ensure that the hooks are seated. See figure 11. Install two #10-24 x 3/8” phillips pan head thread forming screws into the holes at the bottom of the bracket assembly and tighten securely.

12. Attach the Wall Plate Casting to the Wall Bracket and tighten the set screw using the 5/32” hex key. See figure 12.

Mounting Channel

13. Insert the hooks on the back of the Mounting Channel into the slotted standards at the desired height and push down. Tap the top of the channel with a mallet to ensure that the hooks are seated. See Figure 13. Install two #10-24 x 3/8" phillips pan head thread forming screws and tighten securely.

14. Attach the Wall Bracket to the Mounting Bracket using two #10-32 x 1/2" phillips head machine screws, two #10-32 kep nuts and two lock washers (provided) as shown in figure 14.

15. Attach the Wall Plate Casting to the Wall Bracket and tighten the set screw using the 5/32" hex key. See figure 15.
16. Insert the top flange of the Mounting Bracket into the top of the Mounting Channel as shown in figure 16. The bottom flange of the bracket will rest on the bottom of the channel.

17. Slide the Mounting Bracket to the desired location and then install two thumb screws into the threaded holes in the top of the bracket. Turn the thumb screws until they make contact with the rear of the Mounting Channel. **Do not over tighten.** See figure 17.
